

# CERTIFICATE OF ACCREDITATION

**No. K-071**

dated 22.08.2023

The Slovak National Accreditation Service issues a Certificate of Accreditation to an accredited body pursuant to Section 26 par.6 of Act No. 53/2023 Coll. on Accreditation of Conformity Assessment Bodies (hereinafter referred to as the "Accreditation Act").

## EKO-TERM SERVIS s.r.o.

Napájadlá 11/2743, 040 12 Košice

IČO: 31 695 671

### Organizational unit performing the activity of the Accredited Body:

Calibration laboratory

### Workplace of the Accredited Body:

Napájadlá 11/2743, 040 12 Košice

**Identification number of the Accredited Body:** 226/K-071

**Area of accreditation:** Calibration laboratory

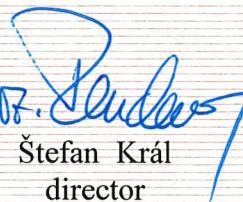

The calibration laboratory demonstrated its competence to perform the accredited activity fulfilling the accreditation requirements of ISO/IEC 17025: 2017 when performing calibration of thermometers and humidity meters, calibration of stationary and mobile automatic emission monitoring systems and to express opinions and interpretation of results of calibrations; to perform the calibration of measurement of the analysers are eligible, which are part of the automated measuring systems for emissions of pollutants from stationary sources of pollution in ambient air and waste gas gauges related reference variables within the accreditation scope delineated in the Annex of this Certificate of Accreditation. The Annex shall form an integral part of the Certificate of Accreditation.

**Number and date of issue of the accreditation decision:** No. 226/10805/2023/1 dated 01.08.2023.

### Validity of the accreditation decision:

The accreditation decision No. 226/10805/2023/1 dated 01.08.2023 is valid from 12.10.2023 to 12.10.2028.

The validity of this Accreditation Certificate expires upon the expiry of the accreditation decision, the decision on withdrawal of the accreditation pursuant to Section 31 or the expiry of the accreditation pursuant to Section 32 of the Accreditation Act.

**NOTES:**

- 1) Opinions and interpretations.
- 2) Sphere of applications – environmental protection, subject area of authorized calibration of measuring analyser, which are part of the automated measurement systems (AMS-E) of pollutant emissions from stationary sources of pollution in ambient air and related instruments and reference quantities of waste gases under Section 20 (1a1) of the Act. No. 137/2010 Coll. On air, as amended later
- 3) Specific calibration requirements are applied according to approval to install the AMS-E, approved documentation or an approved alternative methodology of the relevant continuous measurement
- 4) External calibration of the gas separation station .
- 5) Volumetric fraction in percent.
- 6) The value of the measuring ranges listed above are fixed.
- 7) STN ISO 11042-2 applies for gas turbines.
- 8) Execution of the activity at t he customer's. (AMS-E)
- 9) Execution of the activity at the laboratory or at t he customer's (EMS/AMS).

- 10) For gases with approximately the same density as air.
- 11) Expanded measurement uncertainty – uncertainty characteristic of the given measurement range, which is achievable under standard conditions prescribed in the relevant methodology, expressed as expanded uncertainty with a coverage factor  $k=2$  at 95 % probability, expressed in % of the value, unless otherwise specified.
- 12) Possibility to express calibration result as  $C_3H_8$ ,  $CH_4$  based on customers request
- 13) Valid also for AMS-G
- 14) Valid to temperature 180° - 250° C with partial immersion
- 15) The suitability of the reference material demonstrated in accordance with PL 13.
